

Sol & Scent

by Subarna

GOLDEN HOUR, ANYTIME!

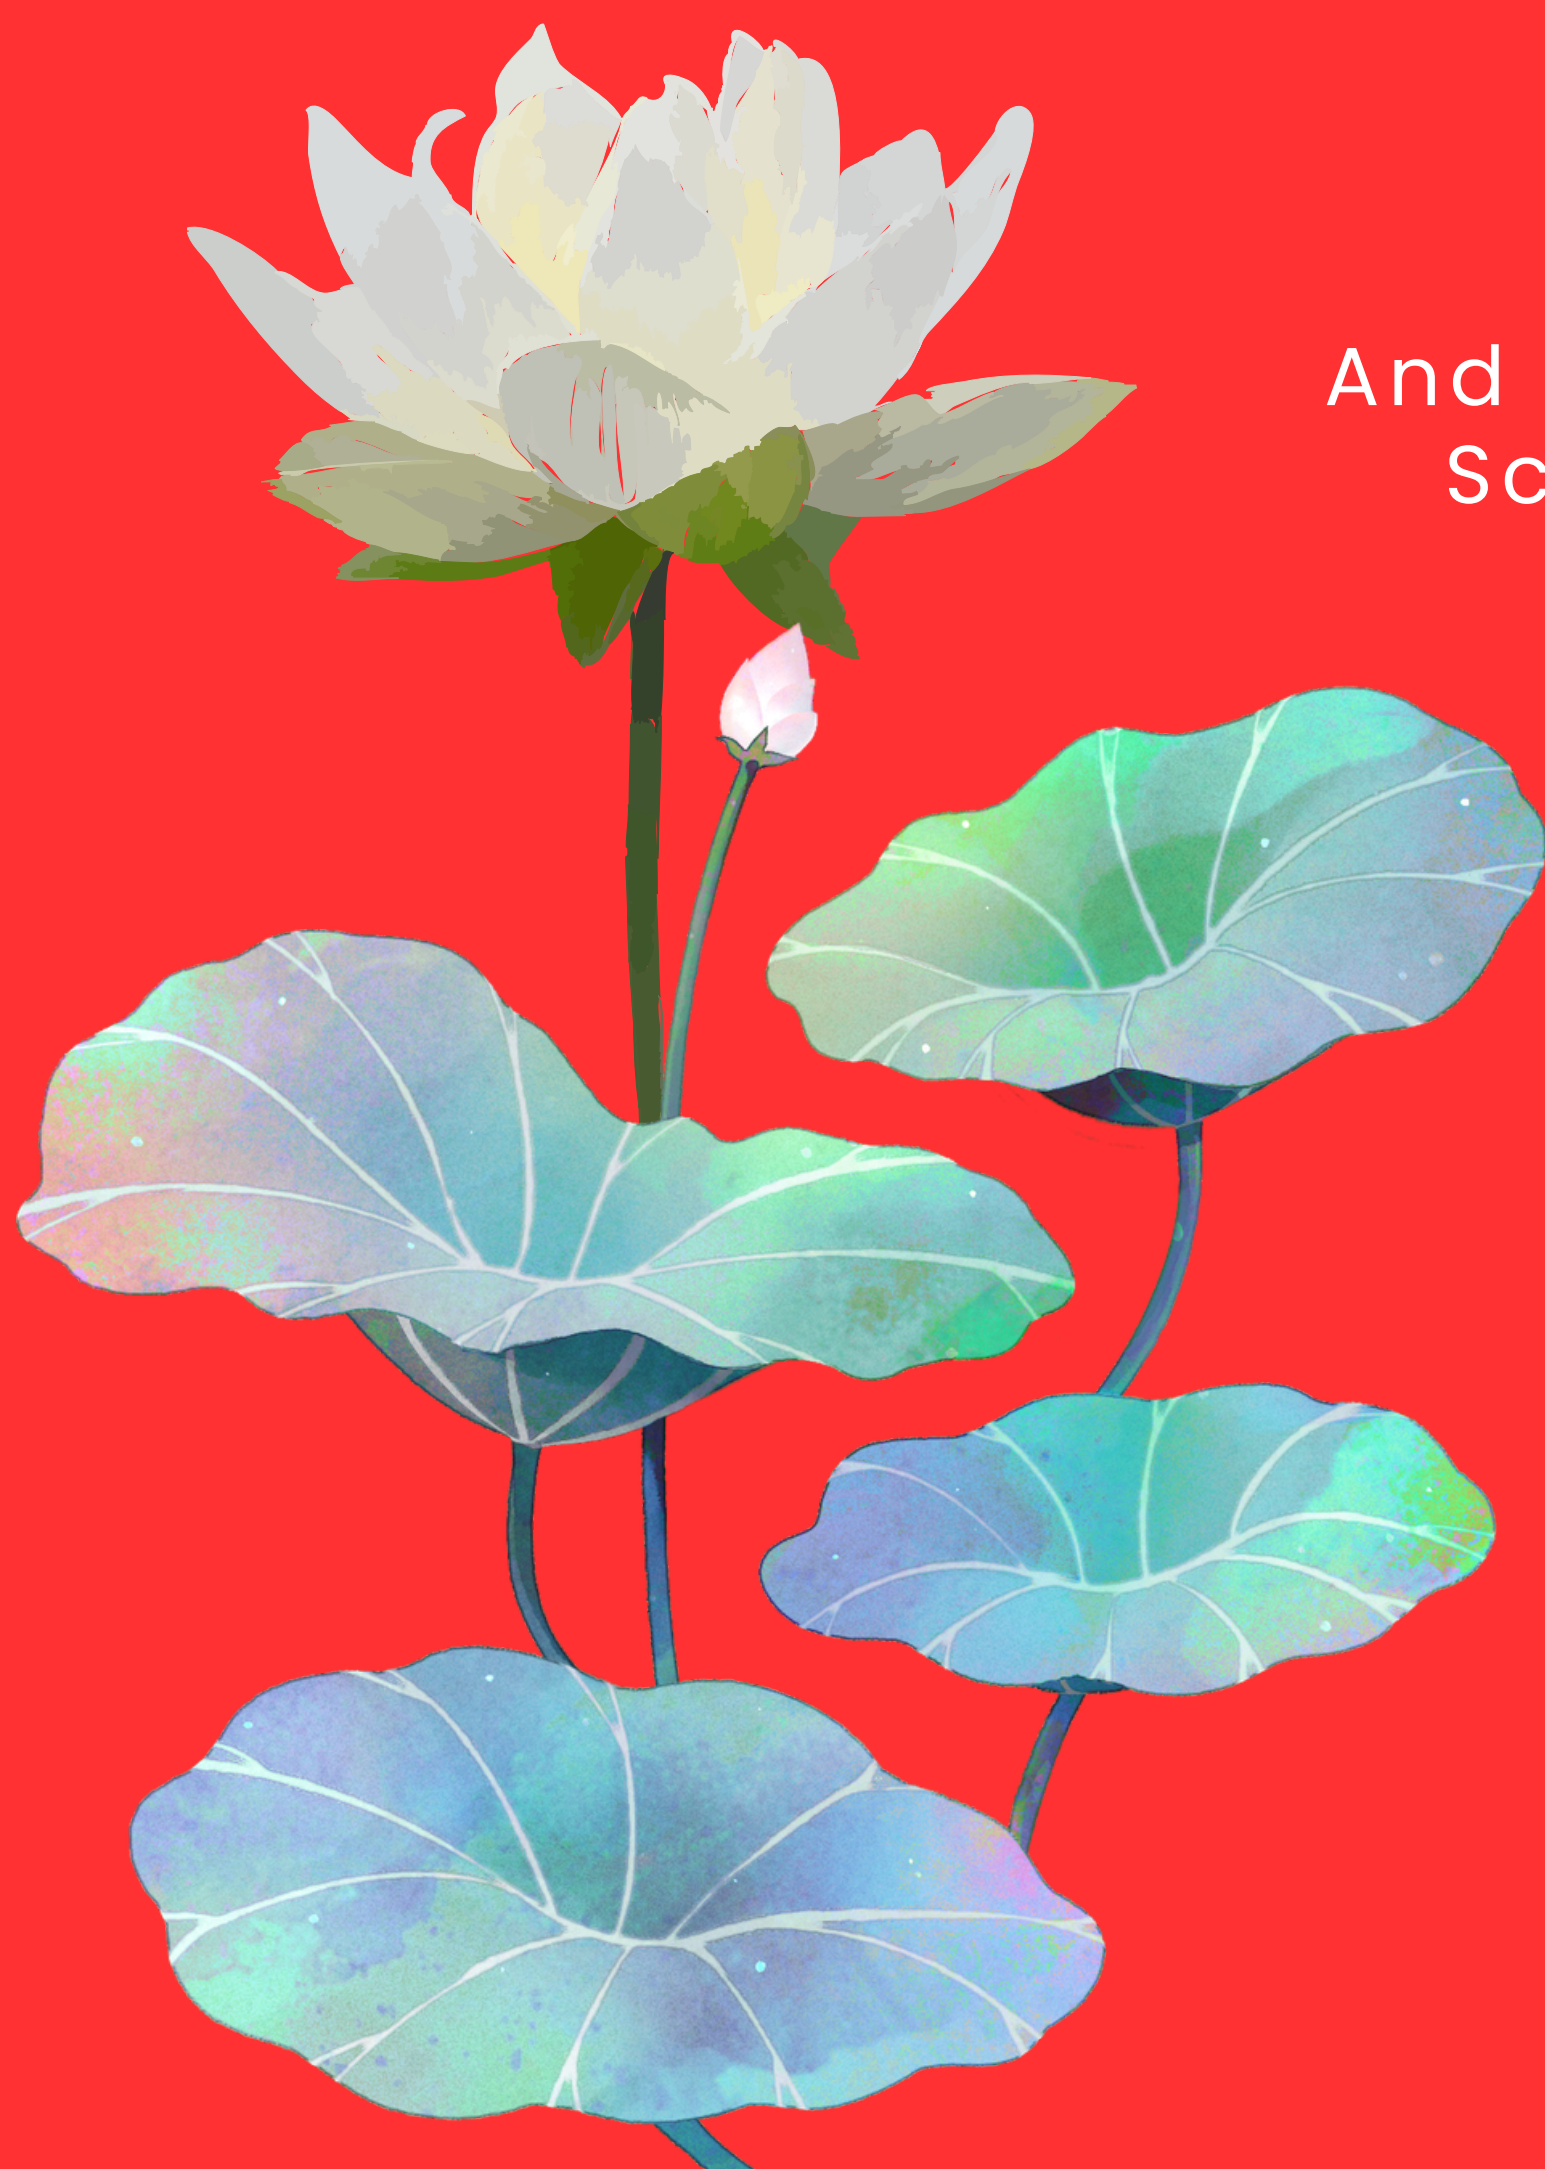

Every candle has a story.

This one began with a simple love for fragrance, warmth, and the little details that make a space feel inviting.

As a mother, creating a warm and welcoming home was always second nature to me. Over the years, that love found its way into candle making, becoming a passion I kept returning to, one scent, one pour, one experiment at a time.

What started as a hobby slowly became something bigger. And today, that passion takes shape as Sol & Scent, created to bring a little warmth and joy into homes beyond my own.

*~ With Love,
Subarna*

Over the years, I noticed something.

My daughters were always searching for gifts that felt thoughtful and beautiful without breaking the bank.

At the same time, I found them reaching for candles during their lives' quieter moments. Beside an evening cup of tea. Next to a good book on a rainy afternoon, or adding that final touch to a beautifully styled table, because sometimes the perfect frame deserves a little glow.

That's when it clicked. A candle can be both.

A thoughtful gift for someone you care about.

And a simple way to make everyday moments feel a little more special.

Whether you're gifting it to a friend or lighting it for yourself, Sol & Scent is made to bring warmth, fragrance, and joy into every space.

A beautiful candle should do more than sitting on a shelf.

Whether it's adding warmth to your favorite corner at home or becoming a gift someone genuinely loves, finding something that's beautiful, thoughtful, and practical shouldn't be difficult.

That's the philosophy behind every Sol & Scent candle.
